

ENVS 153 Final Project

2026-05-12

1. Setup

Packages

```
# general use
library(tidyverse)
library(janitor) # clean column names
library(lubridate) # clean date

# file organization
library(here)

# data visualization
library(naniar) # copied from week-04_class
library(patchwork) # copied from week-04_class
library(viridis) # color palette
```

Data

```
spittlebug <- read_csv(here("data", "env153_project_data_sheet.csv"))
```

2. Cleaning

```
# create new object from weather
spittle_clean <- spittlebug |>
  # clean column names
  clean_names() |>
  # change date column to standard format
  mutate(date = mdy(date)) |>
  # extract month and year from date column
  mutate(month = month(date),
         year = year(date))
```
